PROFILE

- Dynamic Software Engineer with 1.5 years of experience in full-stack development, API integration, and database solutions. Skilled in Java, Angular, Spring Boot, and SQL with a focus on scalability and system performance. Proficient in Agile methodologies, RESTful API development, and microservices architecture.

EXPERIENCE

- **Yardi Software India Pvt. Ltd.** Pune, India
Software Engineer Nov 2023 – Present
 - **Agile Collaboration:** Collaborated with cross-functional teams during Agile ceremonies including daily stand-ups, sprint reviews, and sprint retrospectives to ensure alignment and timely delivery of features.
 - **Database Solutions:** Implemented database solutions using SQL scripts, successfully delivering over 50 data packages to maintain data integrity and consistency within RentCafe — a web-based product built with Angular and .NET technologies.
 - **Middleware Development:** Designed and implemented a threshold-based middleware to regulate third-party vendor requests, optimizing API efficiency by limiting request rates and triggering backend updates only for relevant changes. Included comprehensive logging for system monitoring.
 - **Admin Panel:** Developed a dynamic Angular-based admin panel enabling granular control over middleware configurations, with Role-Based Access Control (RBAC) and reactive forms for a secure, user-friendly experience.
 - **REST API Integration:** Built and integrated RESTful appointment APIs in StudentCafe, facilitating seamless data exchange and scheduling with third-party vendors.
 - **CI/CD Implementation:** Utilized Git for version control and implemented CI pipelines using industry-standard tools to support continuous integration and deployment (CI/CD) practices.
- **Hitachi Vantara** Pune, India
Application Engineer Intern Jan 2023 – Aug 2023
 - **Full-Stack Training:** Completed an intensive 3-month training program in Java, Spring Boot, Angular, SQL, and AWS, achieving over 90% in assessments and demonstrating strong foundational proficiency across the full-stack.
 - **API Development:** Led the design and development of RESTful APIs using Spring Boot, integrating them with Angular-based frontend systems to deliver responsive and scalable web applications.
 - **Microservices:** Applied microservices architecture principles to improve the scalability, maintainability, and deployment of core application modules.
 - **Agile Practices:** Participated in Agile ceremonies, including sprint planning and daily stand-ups, to align development tasks with business priorities.
 - **Collaboration:** Collaborated with peers and mentors to analyze requirements, prototype solutions, and implement features aligned with user needs and system objectives.

PROJECTS

- **AssetMon: Asset Monitoring System:**
 - Developed a real-time data center monitoring system using Java, Spring Boot, and Angular.
 - Enabled live sensor data visualization using Highcharts.
 - Implemented JWT-based authentication and RBAC for secure access.
 - Applied microservices architecture for scalability and fault tolerance.
 - Optimized backend performance to handle high-throughput sensor data.
- **BugTrackerX: Defect Tracking System:**
 - Built a defect tracking system using Java, Angular, and Spring Security with JWT authentication.
 - Developed role-based modules for Administrator, Staff, and Customers.
 - Created and consumed RESTful APIs for seamless frontend-backend interaction.
 - Used PostgreSQL for data storage and ensured efficient query handling.
 - Focused on a user-friendly and maintainable architecture.

EDUCATION

- **GH Raison College of Engineering** Nagpur, India
B.Tech in Computer Science and Engineering; CGPA: 9.28 *2019 – 2023*

TECHNICAL SKILLS

- **Languages:** Java, SQL, TypeScript, HTML5, CSS3, JavaScript, C#
Frameworks: Angular, Spring Boot, .NET
Developer Tools: Git, GitHub, IntelliJ, Postman, PostgreSQL
Libraries: Bootstrap, Material-UI, HighCharts
Fundamentals: Data Structures, Algorithms, OOP, Operating Systems, Computer Networks, DBMS, Problem Solving, Cloud Computing (CI/CD, Docker, Version Control Systems)

EXTRA-CURRICULAR ACTIVITIES

- **Virtual Learning Weekend:** Organized and led a Virtual Learning Weekend event, mentoring and coordinating over 50+ students to achieve their learning goals, while delivering valuable insights and support through structured technical sessions.
- **Technical Writing:** Authored technical articles for the GeeksforGeeks platform, covering advanced topics such as Dart Null Safety and Lexical Analyzer Programs, showcasing strong technical depth and effective written communication skills.
